TASKSHEET 06 - Basic Well Control

OBJECTIVES

Upon completion this task you should be able to:

THEORY

1	Describe the negative impact and effects of a well control incident.		
2	Describe what is the meaning of "Blow Out". What can cause it and what are the dangers.		
3	Define the term "well integrity management" and explain why this is important.		
4	Define the term hydrostatic pressure, formation pressure and fracture pressure, overbalance and under balance pressure.		
5	Discuss the differences between an open hole, cased hole and production wells with respect to well head pressure.		COMPLETED DURING WELL CONTROL TRAINING ON 21-JUNE-2022
6	Discuss the principle of the Mud systems used when drilling wells. Describe what is meant by overbalanced and under balanced and when these would occur.		
7	Define the term "barrier" and principle of barrier envelopes.		
8	Explain the principles of different barrier types.		
9	Define the terms "primary" and "secondary" barriers.		
10	Understand testing barriers concept: Inflow test, pressure test and why integrity testing is used.		
11	Explain the principles of the different well control methods.		
12	Describe how hydrates form and how to prevent them.		
13	Explain about Well Shut In and needs for operation.		
14	Define the management of operation regarding the well control.
