1 PROFILE

GOWell is an emerging high-tech company with research and development groups based in **Houston** and **Beijing** committed to find innovative and highly reliable wireline logging technology solutions for you. Our global footprint includes offices in Dubai, Calgary, Maturin, Moscow, Baku, Cairo and Jakarta. Wherever you may be in the world, you can rely on our **international teams of industry experts** to provide you with flexible and affordable business solutions to fit your every need.

Driven by highly entrepreneurial spirit we are uniquely positioned to combine **global talent** and **resources** to provide you with highly engineered and competitively priced wireline logging tools and professional customer support. With the excellent feedback from our customers, GOWell makes continuous improvement of the products and technical support. We are ready to make your wireline service dreams come true.

WORLD-CLASS MANUFACTURING

GOWells Global Manufacturing System (GGMS) is based in Xi'an (China) and extends to Houston, TX (United States). GGMS provides innovative downhole logging tools and surface logging systems for CH/OH/LWD with advanced technology, high quality & reliability, cost effectiveness, and timely technical support. GGMS always focuses on QHSE, Business Integrity, and Customer Satisfaction.

MISSION

GOWell's mission is to develop, manufacture and support fit for purpose and reliable **Wireline Technology** solutions including **Formation Evaluation, Well Integrity** and **Production Analysis**. Our success will be achieved through delivering High Quality Products and Excellent Service Support combined with a flexible business approach. Our mission works to unify us in a common cause and growth strategy. Our shared purpose attracts and unites an exemplary group of people, across all hemispheres, which is one of the defining elements that enables us to succeed.

2 CORE VALUES

In order to deliver, we have a set of Core Values that underpin every aspect of our business:

■ **Safety**

Safety lies at the core of our business. We will always strive to do our utmost to uphold the highest standard of safety and endeavor for the improvement of health, safety and security for our employees and community.

■ **Excellence**

We endeavor to deliver world-class products and services. Delivering superior technology, innovative product development and exceptional customer service are of paramount importance to meet and exceed our customer's expectations.

■ **Learning**

Knowledge sharing and collaboration amongst our team members is key to our success. The ability to question assumptions and beliefs, learn from our successes and our shortcomings and be committed to continuous growth in our community are essential elements to achieve the full potential of our employees.

■ **Team Work**

Team Work plays a crucial role in achieving our common goals. By combining our knowledge and expertise, we boost the value of our performance, and in turn the value of our service and support to our customers.

■ **Customer focus**

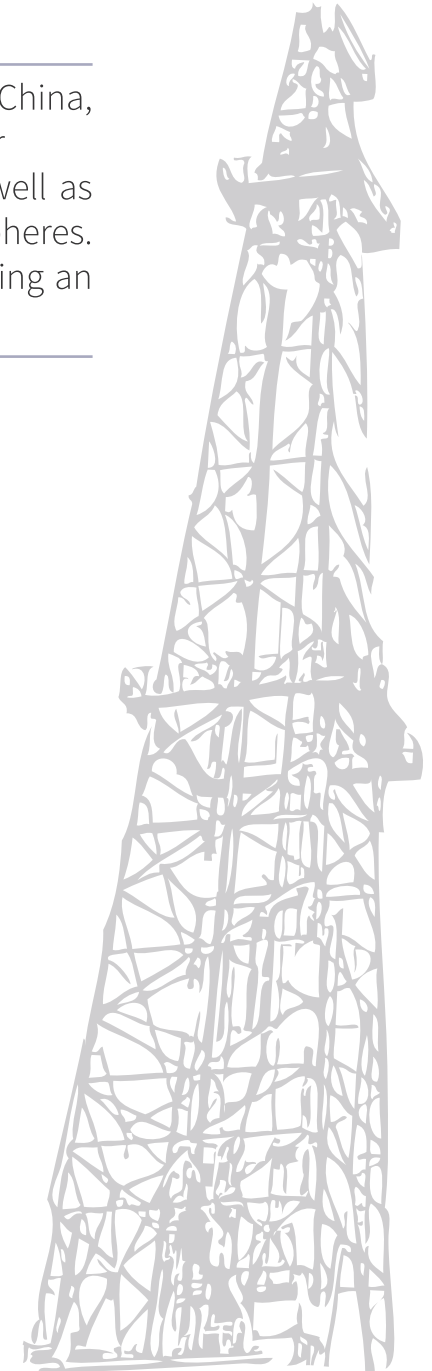

We listen to our customers and strive to provide solutions to meet their preferences. We are constantly expanding our global footprint in order to stay close to them and provide them with the Technical Support they need in order to be successful. Their success is ours too.

VISION

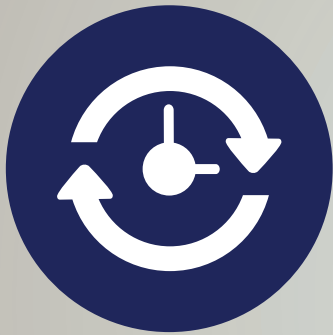

We aim to become your supplier of world-class wireline logging equipment of choice.

HISTORY

At GOWell, we are constantly evolving to meet our customer's growing needs. Our roots are in China, where the company was founded. After a few short years, we have expanded globally to cover our customer base, having Research and Development groups in Houston, TX (United States) as well as technical support centers and providing training for the usage of our technologies in both hemispheres. We have come a long way, and we are eager to continue to grow, while maintaining and fostering an intimate and familial environment. At GOWell, each individual makes the difference.

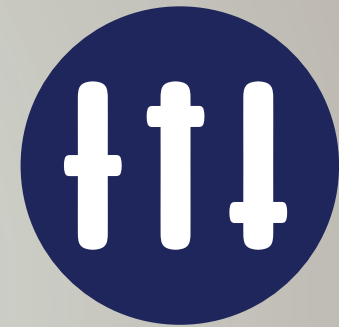

WHY CHOOSE GOWELL?

SHORTEST LEAD TIMES
IN THE INDUSTRY

3 PRODUCT PORTFOLIO

We offer a wide range of products to fit your every need.

1. Standard Formation Evaluation

- Surface Acquisition System
- Resistivity (DLLT, DILT, MSFL, AILT)
 - Dual Lateral Logging Tool
 - Dual Induction Logging Tool
 - Micro-Spherical Logging Tool
 - Array Induction Logging Tool
- Sonic (XDLT, HDSL)
 - X-Dipole Logging Tool
 - High Definition Sonic Logging Tool
- Nuclear (CNLT, TIGR, LDLT)
 - Compensated Neutron Logging Tool
 - Telemetry/Inclinometer Gamma Ray Tool
 - Litho-Density Logging Tool

6. Production Logging

- WTC/CCL/GR combination Tool
- Temperature and Pressure Combination Tool
- High Resolution Quartz Pressure Tool
- Water holdup Tool
- Inline Flow Meter
- Fullbore Flowmeter
- Fluid Density Tool

5. Cased Hole Formation Evaluation

- Through Casing Formation Resistivity (TCFR)

4. Formation Pressure & Sampling

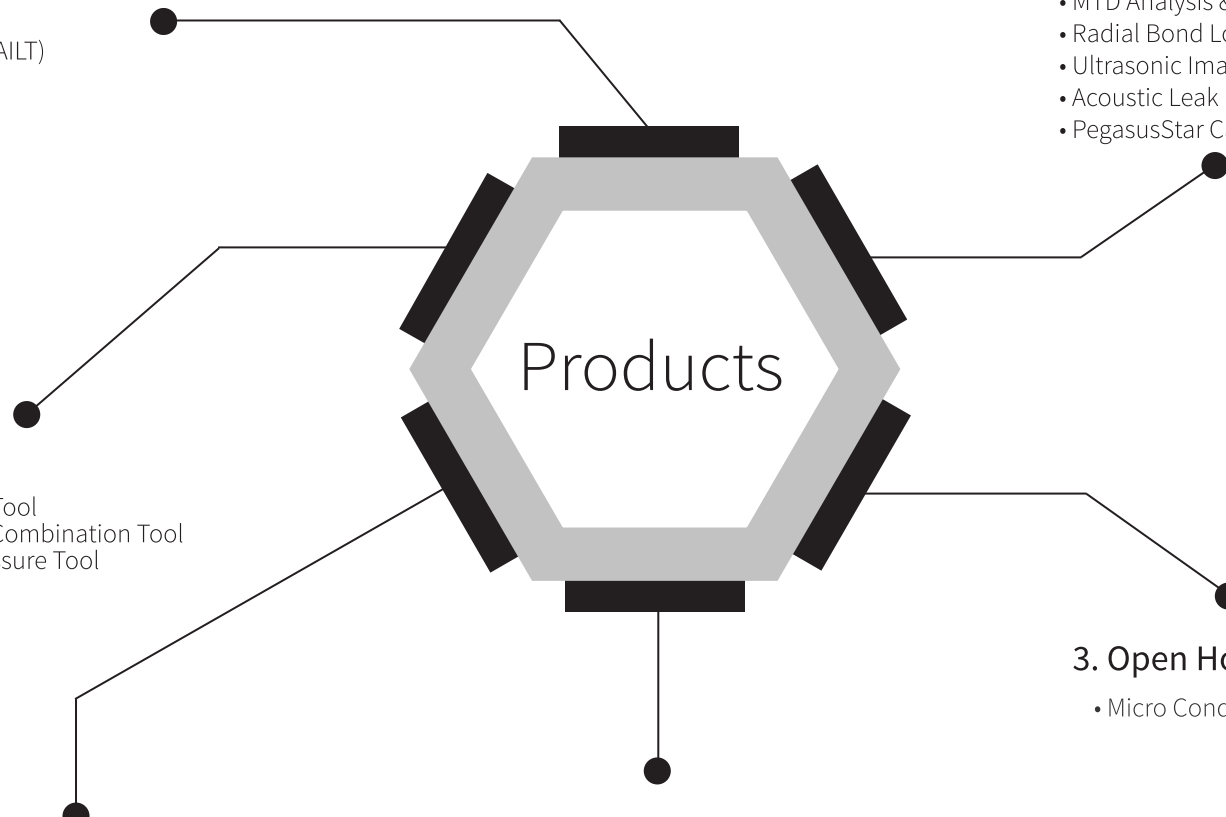

- Slim Formation Pressure Tester (SFPT)

2. Well Integrity Evaluation

- Multi-Finger Caliper (MFC)
- Magnetic Thickness Detector-E (MTD-E)
- MTD Analysis & Reporting
- Radial Bond Log (RBL)
- Ultrasonic Imaging Logging Tool (UILT)
- Acoustic Leak Flow Analyser (ALFA)
- PegasusStar Cased Hole Logging Platform

3. Open Hole Imaging

- Micro Conductivity Imager Tool (MCI)

We develop, **Manufacture** and support fit for purpose and reliable Wireline technology solutions including **Formation Evaluation, Well Integrity** and **Production Analysis.**

4 STANDARD FORMATION EVALUATION

At GOWell, we design and manufacture Wireline Logging Technology that meets and exceeds industry standards. Our R&D initiatives are focused to attend to new demands and industry developments. Our product range is subject to change as tools are constantly being improved. Open Hole Logging provides formation evaluation after a new well has been drilled, which is crucial to assess its commercial value. Our technology is complemented with geoscience services and our **GallopStar suite** is fully combinable with technical specifications able to meet the majority of market needs. Our Acquisition Software **PETROEYE** is able to capture downhole information and a variety of displays for easy interpretation.

RESISTIVITY

Our series of formation resistivity measurement tools provide quality response in all environments including low to high salinity, water based muds and oil-based muds. Our resistivity suite includes AILT, DILT, DLLT & MSFL. The tools are combinable with any other Gallop tool for more specific results.

NUCLEAR

Our Compensated Neutron Logging Tool (CNLT) as well as our Litho Density Logging Tool are useful in determining the Formation Porosity & Lithology of a well, which can help manage production schedules and even contribute to the extension of the life of a well. Our tools can be combined with other Gallop 12 tools in order to provide shale volume and hydrocarbon identification.

SONIC

Our sonic suite includes the High Definition Sonic Logging tool (HDSL), and one of the latest additions to the Gallop family, the X-Dipole Logging tool (XDLT). They provide petrophysical evaluation and geophysical applications. These include Formation Porosity measurements, seismic correlation, gas detection, rock anisotropy & permeability and cement bond evaluation.

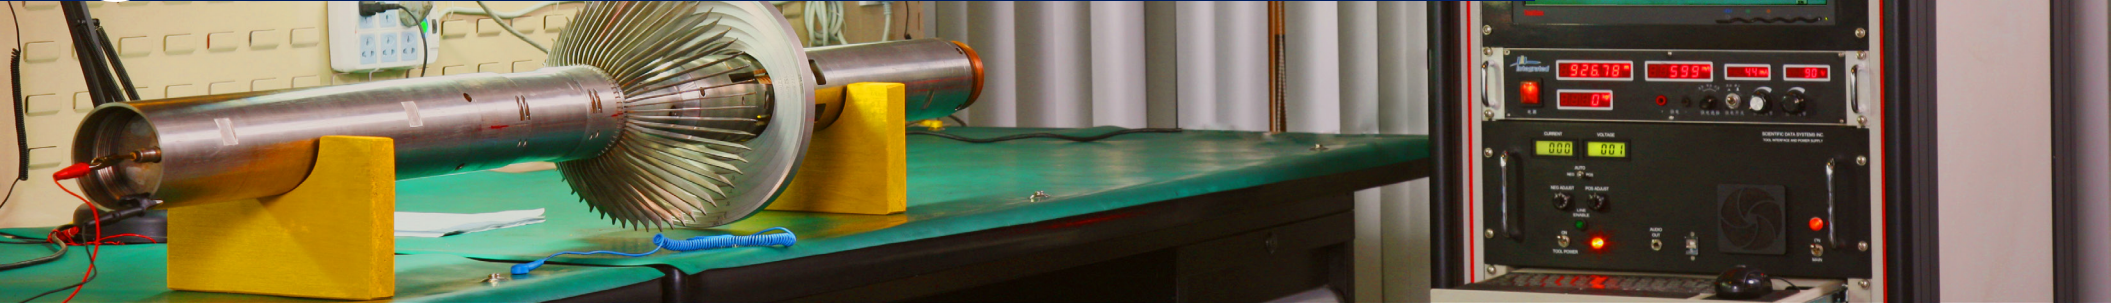

GALLOPSTAR

“Our Integrated GallopStar suite system is flexible & reliable, offering comprehensive Open Hole Formation Evaluation.”

5 CASED HOLE SERVICES

At GOWell, we design and manufacture Cased Hole equipment for Oil and Gas companies. Deterioration of both the casing and tubing of an oil well due to corrosion, formation movements and several other factors is extremely common and requires close inspection. Our tools will help you minimize the remedial work required, by pinpointing exactly where the problem lies. Our R&D initiatives are continuous as we are constantly adapting to new demands and industry developments. Our product range is subject to change as tools are constantly being improved.

WELL
INTEGRITY

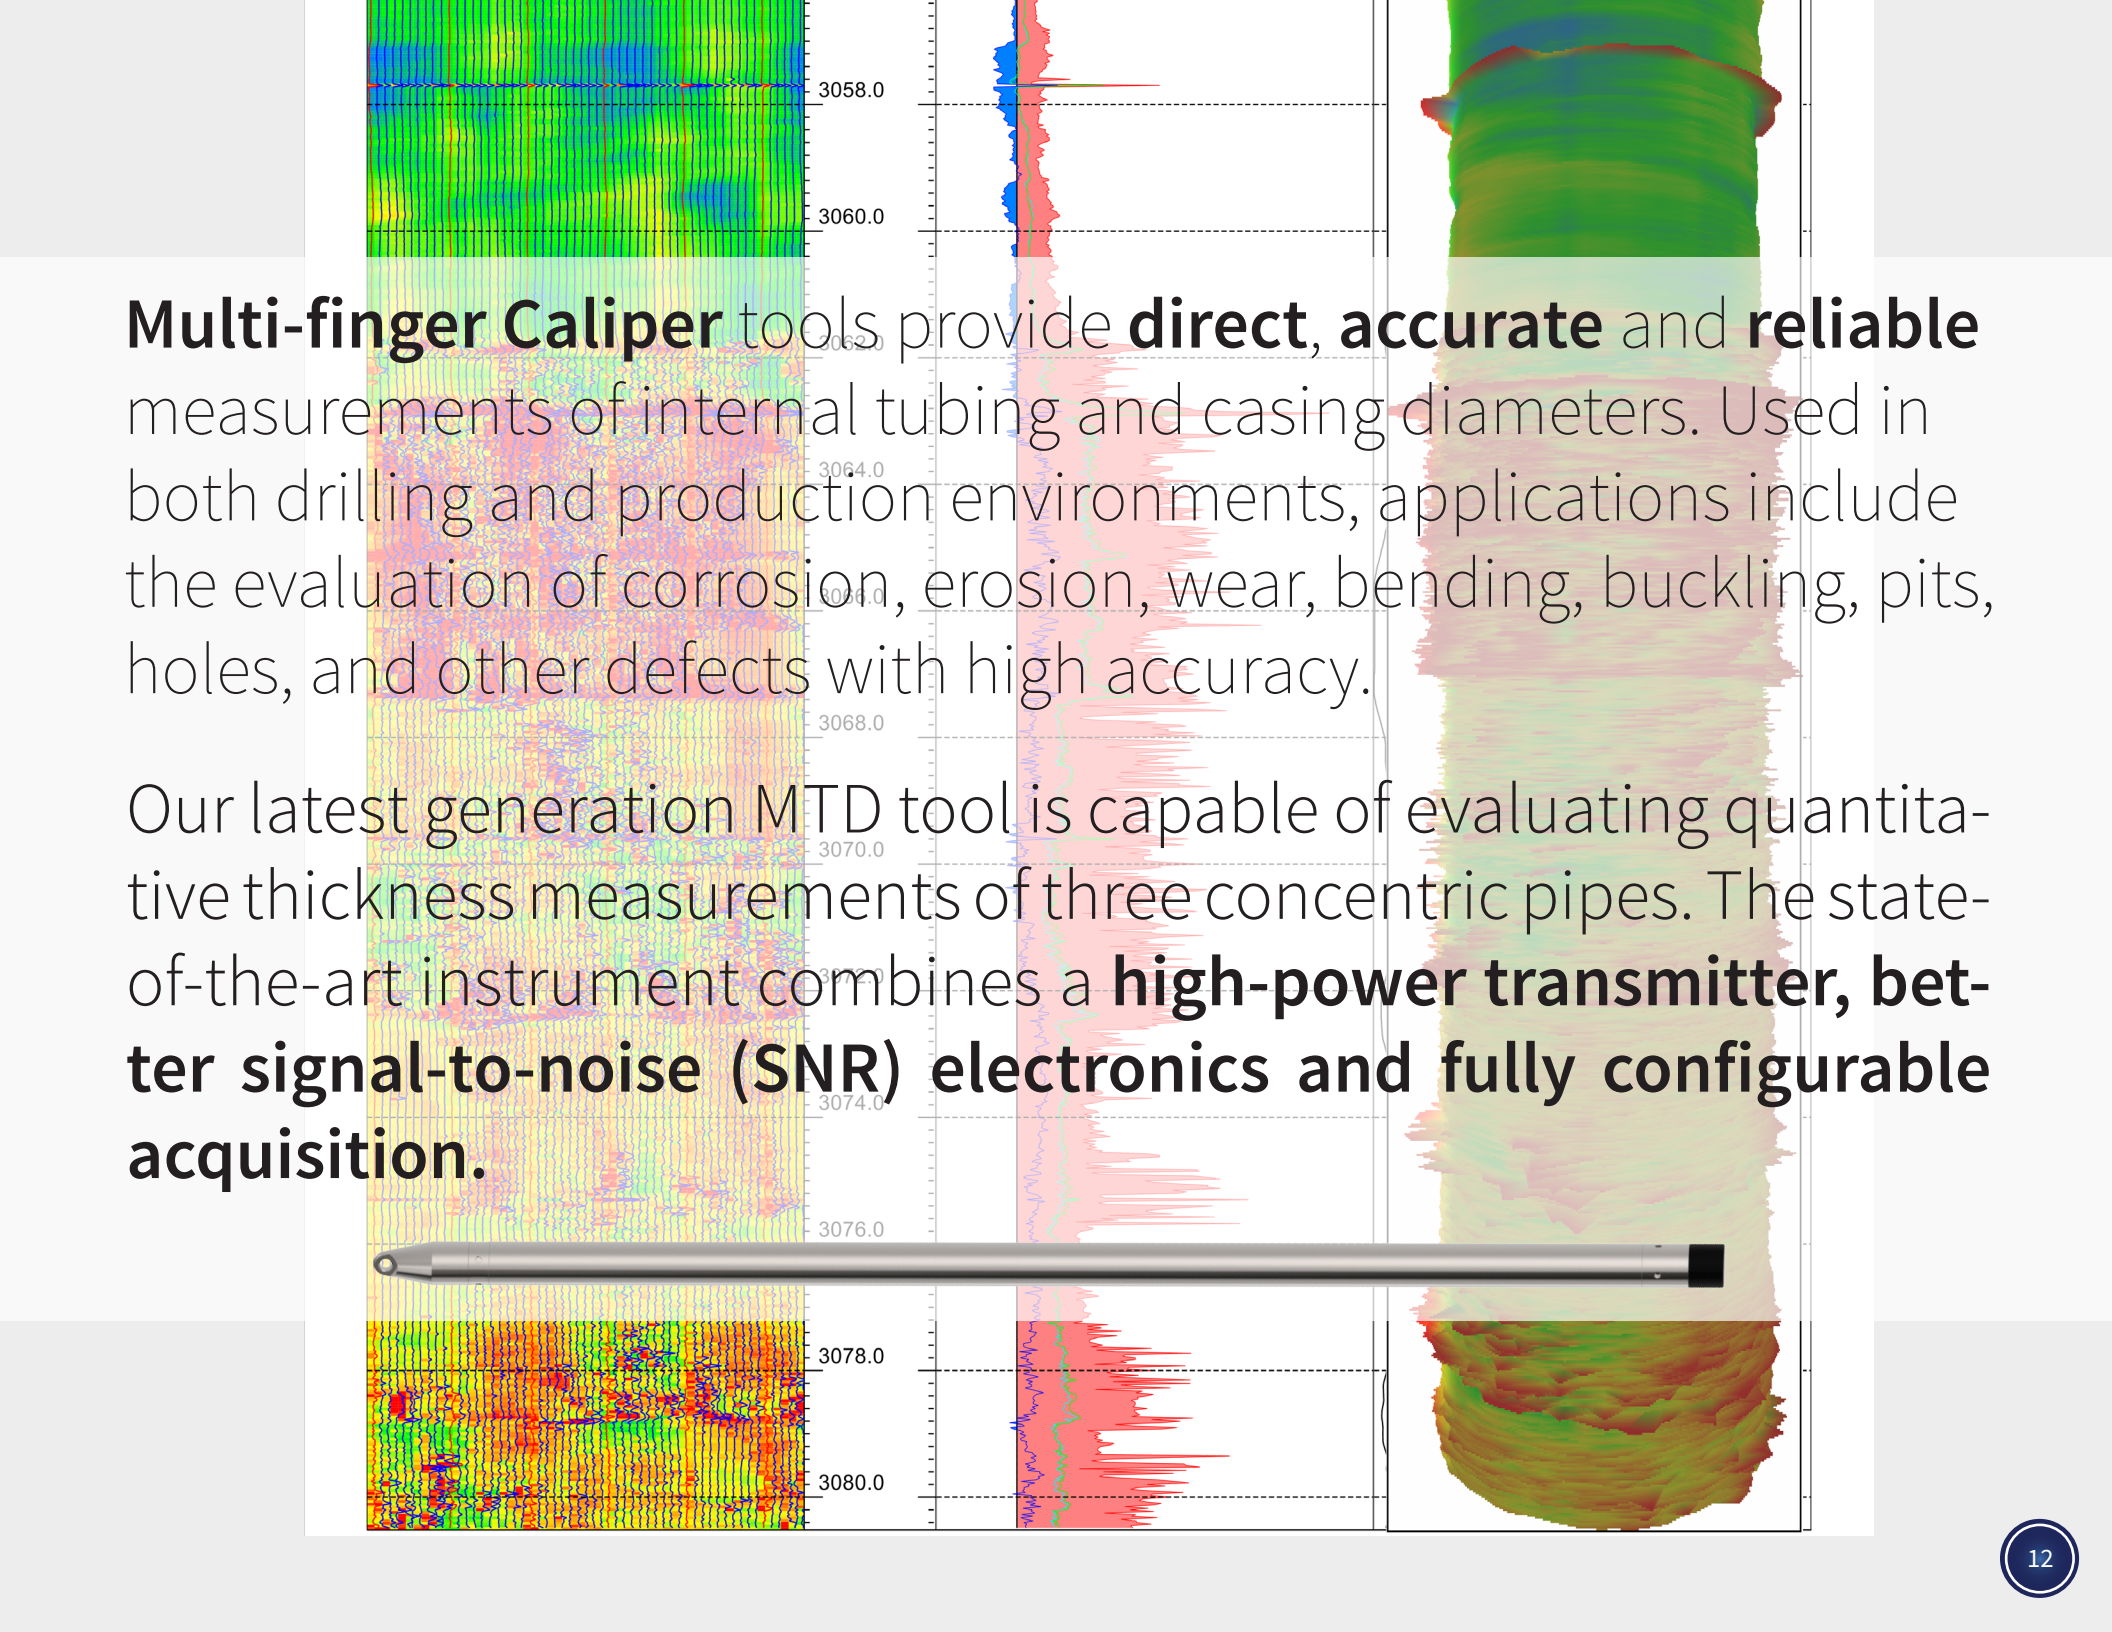

PRODUCTION
LOGGING

PERFORATING

Having the ability to identify certain irregularities and defects in a well's casing and tubing, is crucial as it will quickly help determine what immediate action to take to solve the problem before a costly integrity incident occurs. With GOWell's promise of quality and affordability and technical support available 24/7, we make sure to minimize your spending by helping you evaluate the condition of the casing, tubing and cement quality in your well.

PEGASUSSTAR

PegasusStar is GOWell's latest generation cased-hole logging platform, consisting of a fast and capable telemetry sub for surface-readout (SRO) operations and a comprehensive memory recording system. The platform is compatible with a wide range of GOWell's **Pegasus** series downhole tools and the industry leading Warrior 8 software.

Multi-finger Caliper tools provide **direct, accurate** and **reliable** measurements of internal tubing and casing diameters. Used in both drilling and production environments, applications include the evaluation of corrosion, erosion, wear, bending, buckling, pits, holes, and other defects with high accuracy.

Our latest generation MTD tool is capable of evaluating quantitative thickness measurements of three concentric pipes. The state-of-the-art instrument combines a **high-power transmitter, better signal-to-noise (SNR) electronics** and **fully configurable acquisition.**
