5.5 Explain what do you understand from Job Safety Analysis and how does this help you to be safe?

Job Safety Analysis is commonly called as Job Hazard Analysis (JHA) which is to identify safety elements of each job/task by step and teach the employee on how to avoid potential safety hazard. Its help me to be safe in safety and health awareness, which communication between workers and supervisors is improved, and acceptance of safe work procedures is promoted. ✓

5.6 What are the safety precautions to be taken during tool maintenance at warehouse?

Safety precautions during tool maintenance is wearing full PPE such as, wearing gloves, eye protections, safety helmets, safety boots and coverall. Always aware of pinch point which may hurt or attend to injury. Make sure to use tools properly. It is good to keep housekeeping every after tool maintenance to ensure safety. ✓

5.7 What are the safety precautions to be taken during topping up the fuel into Power Pack Tank?

Safety precautions during topping up fuel in Powerpack is wearing latex glove and full PPE such as eye protections, safety helmets, safety boot, and coverall. Avoid fuel or diesel from contact skin, eyes or any body part. Try to avoid breathing in vapours or mists of fuel/diesel. Always clean up floor whenever diesel/fuel spills. Keep cleaning and housekeeping once done fuel. ✓

5.8 What is work permit & why do we need them?

Work permit is a written record which authorized specific work at specific location for a specific period of time. I need for work to be done, which the equipment to be used and which personnel involved so the precautions can be taken while performing the task. It is important so actions can be taken while in an emergency. ✓

5.9 When do we apply the work permit

Work permit should be applied before we going to specific location for a specific work. For applicant, work permit should be ready before work. ✓

5.10 What are the safety precautions to be taken during test lubricator and BOP?

Check condition/replacement if hose damaged then pressurized slowly and gradually. Perform at 3rd party's hydrotest bay area and barricade area. Ensure the connections are tightened. Install whip check and wear suitable high impact glove. Try to use both hands to operate properly. Make sure to dispose waste into oil drum and put labelling.

5.11 What are the safety precautions to be taken during test Control Panel?

Check condition/replacement if hose damaged then pressurized slowly and gradually. Ensure whip check is installed. Ensure that all needle valves and air regulators are close, then make sure "0" pressure prior to disconnect hose. Make sure pressure gauge in good condition and verify that test pressure doesn't exceed working pressure. Hydrotesting activity at 3rd party hydrotest bay. Wear suitable high impact gloves and use both hands to operate.

5.12 Why JSA, Risk Assessment and Job Plan need to be discussed among the team member? How does that work?

The purpose of all those is to ensure consistent and safe work method. While discussing with team member, we can list down all hazard and try to come out with a good solution to avoid the hazard. It is reducing injury, provides a safe environment and can perform at the best while working as a team.

5.13 While working, you found that there is something unsafe. What should you do?

Report unsafe and unhealth situation or either injuries to our supervisor or HSE which is Fredoline are in-charge immediately, and try to take responsible actions such as take reasonable care of ourselves and others to avoid unsafe action.

5.14 Before performing a hot work, what must you do/ have to ensure the work is safe

Wear appropriate PPE and ensure all PPE are followed to prevent exposure to flammable gases or vapors. Wear face shield, safety glasses, leather gloves, safety boots, and RFC coverall. Then try to inspect the work area thoroughly before starting. Always test for flammable gases and vapors in the work area before starting hot work.
