- 7. Stop work Policy

✓ 3.2 What is HSE Policies

- Management is committed to provide a safe and healthy workplace and ensuring that all business activities are conducted in a manner that protects the environment.

✓ 3.3 What is the purpose of 'STOP WORK' policy?

- STOP WORK policy is to gives personnel the authority and responsibility to require that work be stopped when a dangerous situation is observed.

20/8/23

**4 Hazard ID and Incident Reporting**

✓ 4.1 How can we report hazard or unsafe act?

All hazards that are found in the workplace should be reported immediately to a supervisor, the safety department or management.

✓ 4.2 If there is an incident happened at workplace what should we do?

- Make sure record any injury in 'Hazard Hunt Form'.

✓ 4.3 What is the incident reporting process?

- 1. Observe the unsafe act or unsafe condition
- 2. Intervene / Action
- 3. Findings writing
- 4. Agreed solution
- 5. Follow up (if any)
- 6. Closure

✓ 4.4 What is the purpose of Hazard Hunt? And how does that help to be safe?

An awareness campaign where our programs identify and report at least one hazard in their work area.

✓ 4.5 Please explain what is Near Miss

- Near miss is any unplanned event that could've cause physical injury or property loss but didn't.

✓ 4.6 In case of emergency,

a) Firstly what should you do?

First check that I and casualty aren't in any danger. If possible. make the situation safe (assembly point) and call for help.

b) Where is DB assembly point (Base)?

Behind warehouse 41

*EM* 20/8/23

✓ 4.7 Where can you find the emergency contact Number?

At warehouse door

✓ 5. Operational Safety

✓ 5.1 How to prevent an accident before executing certain job or activities

- Attend morning meeting, attend toolbox talk and plan what want do.

✓ 5.2 What is the purpose of Safety Morning Meeting

To reinforce safety standards, introduce new safety requirements and increase employee awareness of potential risks.

✓ 5.3 What is the purpose of briefing and Debriefing

To improve communication and teamwork.

✓ 5.4 What is Permit To Work (PTW)

- PTW is a written record which authorized specific work at specific location for a specific period of time

✓ 5.5 Explain what do you understand from Job Safety Analysis and how does this help you to be safe?

JSA is systematic procedure that breaks each job/task into key training sequences, identifies safety elements of each job/task step and coaches the employee.

✓ 5.6 What are the safety precautions to be taken during tool maintenance at warehouse?

- First aid                      - Proper PPE  
- Fire safety  
- Work in group

*LU* 20/8/23

5.7 What are the safety precautions to be taken during topping up the fuel into Power Pack Tank?

- safety material such as a gas tester, nose mask, ladder, eye google, ropes and act.

5.8 What is work permit & why do we need them?

- PTW is a written record which authorized specific work at specific location for a specific period of time.
- The kind of safeguards required to protect the worker.

5.9 When do we apply the work permit

- Permit work is more formal system stating exactly work is to be done and when and which parts are safe, and we need as responsible person should access the work and check safety at each stage. The people doing the job sign the permit to show that they understand the risks and precautions.

5.10 What are the safety precautions to be taken during test lubricator and BOP?

- BOP should be enclosed in a protective cage during use and transportation and stored in the transport frame

5.11 What are the safety precautions to be taken during test Control Panel?

- Ensure all valves are OFF / CLOSED and the air regulator is turned OFF (Anti-clockwise)

5.12 Why JSA, Risk Assessment and Job Plan need to be discussed among the team member? How does that work?

- Because involves indentifying hazard, assesing risk control to improve people understanding of risks management process and everyone is clear on thier roles and responsibilities and how it works by dividing work, good communication with other and follow the scope work.

5.13 While working, you found that there is something unsafe. What should you do?

- Report unsafe condition and inform other of the problem, if it is dangerous for you to remove the risk, notify a supervisor right away.

*lu* 20/4/23

5.14 Before performing a hot work, what must you do/ have to ensure the work is safe

- The fitness and readiness to use of all the involved equipment must be tested
- Task - specific personal protective equipment /gear should be available at site and workers must be well-qualified on how to use clean, and store them properly
- All combustible and flammable materials should kept away from workplace

**Others**

1. Please attach the supporting documents that you participated in Dimension Bid's Safety program.

a) Job Safety Analysis for each activity that you involve during probation period

- Chipping
- Painting
- Lifting
- Spooling
- Pressure Test

b) Hazard Hunt

c) Safety Talk
