5.4 What is Permit To Work (PTW)

PTW is a written record which authorized specific work at specific location for a specific period of time.

✓

5.5 Explain what do you understand from Job Safety Analysis and how does this help you to be safe?

Job Safety Analysis is commonly called as Job Hazard Analysis (JHA) which is to identify safety elements of each job/task by step and teach the employee on how to avoid potential safety hazard. Its help me to be safe in safety and health awareness, which communication between workers and supervisors is improved, and acceptance of safe work procedures is promoted.

✓

5.6 What are the safety precautions to be taken during tool maintenance at warehouse?

Safety precautions during tool maintenance is wearing full PPE such as, wearing gloves, eye protections, safety helmets, safety boots and coverall. Always aware of pinch point which may hurt or attend to injury. Make sure to use tools properly. It is good to keep housekeeping every after tool maintenance to ensure safety.

✓

5.7 What are the safety precautions to be taken during topping up the fuel into Power Pack Tank?

Safety precautions during topping up fuel in Powerpack is wearing latex glove and full PPE such as eye protections, safety helmets, safety boot, and coverall. Avoid fuel or diesel from contact skin, eyes or any body part. Try to avoid breathing in vapours or mists of fuel/diesel. Always clean up floor whenever diesel/fuel spills. Keep cleaning and housekeeping once done fuel.

✓

5.8 What is work permit & why do we need them?

Work permit is a written record which authorized specific work at specific location for a specific period of time. I need for work to be done, which the equipment to be used and which personnel involved so the precautions can be taken while performing the task. It is important so actions can be taken while in an emergency.

Sticking Services

28/3/25

5.9 When do we apply the work permit

Work permit should be apply before we are going to specific location for a specific work.

✓

5.10 What are the safety precautions to be taken during test lubricator and BOP?

Examine the replacement or condition If the hose is damaged, pressurize gradually and carefully. Make sure all of the connections are tight. Work using both hands, try to do tasks correctly.

✓

5.11 What are the safety precautions to be taken during test Control Panel?

Check condition/replacement if hose damaged then pressurized slowly and gradually. Ensure whip check is installed. Ensure that all needle valves and air regulator are close, then make sure "0" pressure prior to disconnect hose. Make sure pressure gauge in good condition and verify that test pressure doesn't exceed working pressure.

✓

5.12 Why JSA, Risk Assessment and Job Plan need to be discussed among the team member? How does that work?

The purpose of all those is to ensure consistent and safe work method. While discussing with team member, we can list down all hazard and try to come out with a good solution either to avoid the hazard. It is reducing injury, provides a safe environment and can perform at the best while working as a team.

✓

5.13 While working, you found that there is something unsafe. What should you do?

Report any unhealthy or dangerous conditions, or any injuries, right away to our supervisor or the HSSE, Fredoline is in control. I also strive to take responsible measures, such taking reasonable care of myself and others, to avoid doing anything risky.
