D. Rig up Wireline Surface Equipment

 a. List out all surface equipment (Surface and Pressure Gauge)

1. Generator Set
2. Air compressor
3. Powerpack
4. Reel Skid Unit (RSU)
5. Stuffing Box
6. Wireline Mast
7. Lubricator
8. Crossover
9. Blow Out Preventor (BOP)
10. Quick Test Sub (QTS)
11. Ball Valve
12. Hay Pulley
13. Single Well Control Panel (SWCP)

 b. Describe how to connect lubricator section

i) Horizontal

Lay down the lubricator on the dolly trolley and connect three 8ft lubricator sections to the stuffing box at the top. Attach a lifting clamp to the top section of the lubricator. Assemble the necessary equipment for both above and below the BOP, based on the wireline work to be performed. Ensure all quick unions are make-up hand tight.

GAZALI MEHRY
 Operation Manager
 Dimension Bid (M) Sdn Bhd
 Labuan Warehouse
 Slickline Services

ii) Vertical

Install the lubricator riser or adaptor to the tree cap connection, whichever is applicable. The wireline assistant on the wireline deck shall tie the chain block onto the other end of the length of rope held by the assistant on the gin pole. Secure lifting hook of the chain block to the lubricator lifting clamp. Hoist the lubricator by pulling the chain on the chain block until the lubricator is picked up to the required height for stabbing onto the Xmas tree or adaptor.

Note: Provide drawing and parts description on separate paper/page

c. Sketch the equipment required while rigging up from x-mas tree until stuffing box
